1. ADDITIONAL STUDY CONTACT INFORMATION

Sponsor / Clinical Contacts	Labcorp Central Laboratory Services	Emergency Support
Denali Therapeutics Inc. Clinical Operations Manager ALS_Platform@denalitherapeutics.com Phone: +1-650-555-0100	**Americas Project Management** Attn: Global Project Manager 8211 SciCor Drive Indianapolis, IN 46214 USA Email: ALS_RegimenG_AMER@labcorp.com	**24/7 Global Investigator Support** Toll Free: +1-800-555-0199 **Medical Monitor Hotline** Toll Free: +1-800-555-0201
Coordination Center HEALEY Master Protocol Desk Fax: +1-617-555-0102	**EMEA / APAC Project Management** Email: ALS_RegimenG_EMEA@labcorp.com Email: ALS_RegimenG_APAC@labcorp.com	**Logistics / Courier Escalation** Toll Free: +1-800-555-0200

2. COURIER SERVICE AND SAMPLE PICK-UP

To arrange sample pick-up, contact World Courier. Please provide the World Courier representative with your specific Site Account Number, the destination (Labcorp Central Laboratory), and specify that the shipment requires **Dry Ice** (for frozen samples) or Ambient handling. Call the local numbers below:

Country	Telephone Number
United States	+1 800 221 6600 or +1 516 354 2600
Canada	+1 800 555 1234 (toll free)
United Kingdom	+44 207 9287256
Ireland	+353 1 800 771660 (toll free)
Germany (Frankfurt)	+49 69 6970080
France (Paris)	+33 1 41 84 31 31
Italy	+39 02 3800 3900

Country	Telephone Number
Spain (Madrid)	+34 91 7461010
Netherlands	+31 20 6534141
Belgium	+32 2 7125060
Switzerland (Geneva)	+0800 81091 (toll free)
Australia	+61 2 9669 3500
Japan	+81 3 5708 6100
Other Regions	See Site Activation Packet

Note on Scheduling: Because personnel are not available to receive frozen specimens on weekends at the depot, samples should NOT be shipped on Friday unless a Saturday delivery surcharge is pre-approved and dry-ice top-up is guaranteed by the courier.

3. CENTRAL LABORATORY SPECIMEN SCHEDULE

The following tables detail the laboratory assessments evaluated by the Central Laboratory across the placebo-controlled and Active Treatment Extension (ATE) periods. Note: Only in-clinic visits are shown; telephone visits (e.g., Wk 2, Wk 12) require no lab collections.

Placebo-Controlled Period (Weeks 0 - 24)

Assessment	Laboratory	Screening (-42 to -1)	Baseline (Day 0)	Wk 4 (Day 28)	Wk 8 (Day 56)	Wk 16 (Day 112)	Wk 24 / ET (Day 168)
Serum Pregnancy (WOCBP)	Central	X					
Clinical Safety (Hem, Chem, UA)	Central	X	X	X	X	X	X
Coagulation (PT, PTT, INR)	Central	X				X	
Endocrinology (ACTH, Cortisol, fT4)	Central		X				X
Pharmacokinetics (PK Plasma)	Central			Pre, Post	Post	Post	Pre, Post
Biomarker Blood	Central		X		X	X	X
Biomarker Urine	Central		X			X	X
DNA Collection (Optional)	Central		X				
CSF Collection (Optional)	Central		X (Bio)				X (Bio/PK)

Active Treatment Extension (ATE) Period

Assessment	Laboratory	ATE Wk 4 (Wk 28)	ATE Wk 8 (Wk 32)	ATE Wk 16 (Wk 40)	ATE Wk 28 (Wk 52)	ATE Wk 40 (Wk 64)	ATE Wk 52 (Wk 76)
Clinical Safety (Hem, Chem, UA)	Central	X	X	X	X	X	X
Biomarker Blood	Central			X	X		X
Biomarker Urine	Central			X	X		X

** Endocrinology notes: Blood samples for ACTH and Cortisol should be collected at approximately the same time in the morning for each scheduled visit to control for diurnal variation.*

4. REGIMEN G KIT COMPONENTS

Kits are pre-assembled specifically for each visit. Do not substitute tubes between kits, as lot numbers and expiration dates are tracked centrally. All necessary secondary packaging (biohazard bags, absorbents) is included in each kit.

VISIT / TIME-POINT	KIT #	ASSESSMENTS & COMPONENTS
SCREENING Days -42 to -1	**KIT #1**	**Clinical Safety & Pregnancy** (1) 8.5-mL Gold SST (Serum) (1) 3.0-mL Lavender K2EDTA (Whole Blood) (1) Urine Collection Cup + Transfer Tube **Coagulation** (1) 2.7-mL Light Blue Sodium Citrate Tube
BASELINE Day 0	**KIT #2**	**Clinical Safety & Endocrinology** (2) 8.5-mL Gold SST (1) 3.0-mL Lavender K2EDTA (1) Urine Collection Cup + Transfer Tube **Biomarker Blood** (2) 6.0-mL Lavender K2EDTA → (6) 1.8-mL Cryovials **Optional Genomics / DNA** (1) 8.5-mL PAXgene / Specialized DNA Tube **Optional CSF** (1) 15-mL Sterile Conical Tube → (4) 2.0-mL External Thread Cryovials
WEEK 4 & 24 Pre & Post Dose PK	**KIT #3**	**PK Plasma (Pre-Dose & Post-Dose)** (2) 4.0-mL Lavender K2EDTA (4) 1.8-mL Cryovials (Purple Caps) **Clinical Safety** (1) 8.5-mL Gold SST (1) 3.0-mL Lavender K2EDTA (1) Urine Collection Cup + Transfer Tube **Week 24 includes additional tubes for Endocrinology, Biomarkers, and Optional CSF (identical to Baseline kit setup).*
WEEK 8 & 16 Post-Dose PK	**KIT #4**	**PK Plasma (Post-Dose Only)** (1) 4.0-mL Lavender K2EDTA (2) 1.8-mL Cryovials (Purple Caps) **Clinical Safety** (1) 8.5-mL Gold SST (1) 3.0-mL Lavender K2EDTA **Week 16 includes Coagulation (1) 2.7-mL Light Blue and Biomarkers.*
ATE WEEKS (Standard Clinic Visits)	**KIT #5**	**Clinical Safety** (1) 8.5-mL Gold SST (1) 3.0-mL Lavender K2EDTA (1) Urine Collection Cup + Transfer Tube **Selected ATE weeks include Biomarker Blood/Urine components.*

5. SPECIMEN PROCESSING & BLOOD VOLUMES

Strict adherence to the Order of Draw (CLSI H3-A6) is required. Blood must be collected in the sequence: Light Blue → Gold SST → Lavender EDTA. Always program centrifuges using Relative Centrifugal Force (RCF or *g*), not RPM.

Tube Type / Color	Target Assay	Processing Instructions
Light Blue (Sodium Citrate)	Coagulation	Invert 3-4x. Centrifuge at 1,500 x *g* for 15 min at Room Temp (20-25°C). Transfer plasma to cryovial. Freeze immediately.
Gold SST (Serum Separator)	Safety Chem, Endocrinology	Invert 5x. **Allow to clot upright for 30 min.** Centrifuge at 1,500 - 2,000 x *g* for 10-15 min at Room Temp. Ship ambient.
Lavender EDTA (3.0 mL)	Safety Hematology	Invert 8-10x. **Do Not Centrifuge.** Ship as ambient whole blood on day of collection.
Lavender EDTA (4.0 mL / 6.0 mL)	PK Plasma & Biomarkers	Invert 8-10x. Centrifuge at 1,500 - 2,000 x *g* for 10-15 min at 4°C (Refrigerated). Separate plasma into cryovials. Freeze at -70°C within 60 mins.
Specialty Tubes	Genomics / DNA	Invert 8-10x. **Do Not Centrifuge.** Freeze immediately at -70°C.

Maximum Research Blood Volume Table

The table below outlines the estimated blood volume drawn for Central Laboratory assessments at each visit, ensuring safety limits are not exceeded.

Assessment	Screening	Baseline	Wk 4	Wk 8	Wk 16	Wk 24	ATE Wks (Typical)
Clinical Chemistry/Endo (SST)	8.5 mL	17.0 mL	8.5 mL	8.5 mL	8.5 mL	17.0 mL	8.5 mL
Clinical Hematology (EDTA)	3.0 mL	3.0 mL	3.0 mL	3.0 mL	3.0 mL	3.0 mL	3.0 mL
Coagulation (Citrate)	2.7 mL	-	-	-	2.7 mL	-	-
PK Plasma (EDTA)	-	-	8.0 mL	4.0 mL	4.0 mL	8.0 mL	-
Biomarker Blood (EDTA)	-	12.0 mL	-	12.0 mL	12.0 mL	12.0 mL	12.0 mL*
Genomics/DNA (Optional)	-	8.5 mL	-	-	-	-	-
TOTALS (mL)	**14.2 mL**	**40.5 mL**	**19.5 mL**	**27.5 mL**	**30.2 mL**	**40.0 mL**	**11.5 - 23.5 mL**

* Only collected at specific ATE visits (Wk 16, 28, 52).

6. PACKING AND SHIPPING INSTRUCTIONS

All specimens must be transported in accordance with national regulations and IATA Dangerous Goods Regulations for UN 3373 Biological Substance, Category B. Use the specific supplies provided by Labcorp/World Courier.

Step 1: Place samples into Diagnostic Specimens Bag (STP 741)

- Ensure all primary tubes and cryovials are tightly sealed.
- Place samples into the clear plastic STP 741 bag.
- Insert the absorbent material strip (STP 152) into the bag alongside the tubes.
- Remove excess air and seal the bag using the adhesive strip.

Step 2: Place Bag into Secondary Packaging

- Place the sealed plastic STP 741 bag inside the white Tyvek/paper STP 740 bag (if provided) or directly into the insulated thermal box.

Step 3: Temperature Control (Thermal Box & Dry Ice)

- **For Ambient Shipments:** Place the sealed bag into the standard ambient cardboard box.
- **For Frozen Shipments:** Place the sealed bag into the EPS foam insulated thermal box (M9.5). The World Courier driver will pour the appropriate amount of Dry Ice (minimum 5.0 kg to 17.0 kg depending on transit time) over the samples.

Mandatory Documentation

Each shipment tendered to the courier must be accompanied by the following documentation:

- **House Air Waybill (HAWB):** Affix to the exterior of the shipment. This is your internal tracking form provided by World Courier.
- **Sample Requisition Form (PRF/GSR):** Place the completed Requisition Form inside the shipping container, but *outside* the sealed biohazard bag. Retain a photocopy for the subject's chart.
- **Customs Invoice (International Only):** Print the Customs Invoice (Appendix 3) on your hospital/institution letterhead and sign it. Required for cross-border shipments to declare "No Commercial Value".
- **USDA Statement (International to USA):** Required for animal/human material transit to the US. See Appendix 3.

APPENDIX 1: KIT SUPPLY ORDER FORM

Protocol HEALEY - Regimen G: Complete form and fax to Labcorp at +1-317-555-0999

Site Name & #: _____ **Order Date:** _____

Shipping Address: _____ **Due Date @ Site:** _____

Requested By: _____ **Requestor's Phone:** _____

SHIPPING SUPPLIES / KITS	QUANTITY
Kit #1 (Screening)	
Kit #2 (Baseline)	
Kit #3 (PK Visits)	
Dry Ice Shipping Containers (Thermal Box)	
Pre-printed Air Waybills	

APPENDIX 2: SAMPLE REQUISITION FORM (TEMPLATE)

Include this form in the shipping container.

Patient ID Number: _____ **Hospital Name:** _____

Patient Initials: _____ **Investigator Name:** _____

Date of Birth: _____ **Visit Name:** _____

Sex: □ Male □ Female **Fasting Status:** □ Yes □ No

Date Collected: _____

Time Collected: _____

Discrepancies / Notes:

APPENDIX 3: CUSTOMS INVOICE / USDA STATEMENT

Note: This document must be printed on your hospital's letterhead paper, signed, and included in triplicate for any shipments crossing international borders into the United States.

CUSTOMS INVOICE & USDA STATEMENT

Date: _____

Shipper (Site Name & Address):

_____

_____

Consignee:
Labcorp Central Laboratory Services
8211 SciCor Drive
Indianapolis, IN 46214
USA

Contents: Human Other: Blood / Serum / Plasma / CSF / Urine samples

Quantity: _____ mL

Non-Infectious specimens from a normal, non-risk population.

For Clinical Laboratory Testing Only.

Human material containing no animal material and not of tissue culture origin.

The material was not obtained from Humans or Non-human primates that have been inoculated with or exposed to any livestock or poultry disease agent exotic to the United States.

The material is not zoonotic.

Value: No Commercial Value - For Customs Purposes Only $10 USD
